Opened for trekking in the 1990s, Manaslu Trek is an adventurous and challenging trekking trail in Nepal Himalaya. It is a journey to the base of Mt. Manaslu (8163 meters), the eighth tallest mountain in the world, geographically close to Nepal-Tibet (China) border. Adventure Thirdpole Treks was one of the first companies to take trekking groups into the region. It, however, remained virtually inaccessible from 1996 till 2006 due to political unrest. In terms of tourism, Manaslu is still categorized as 'controlled area' so special permits are required to trek here.
